

Google Cloud Platform SKUs

The following is the list of SKUs and prices for Google Cloud Platform services (updated from 27/10/2565 to 1/7/2566). Any price changes will be made in accordance with the Agreement.

Spot prices (<https://cloud.google.com/compute/docs/instances/spot>) are dynamic and can change up to once every 30 days, but always provide discounts of 60-91% off of the corresponding on-demand price for machine types and GPUs as well as smaller discounts for local SSDs.

List prices for Compute Engine Flexible Committed Use Discounts ("Flex CUDs") are representative only; the applicable price is available via the Admin Console and may be higher or lower depending on other active Compute Engine discounts. The total effective discount for Flex CUDs as compared to on-demand prices will be as described at <https://cloud.google.com/billing/docs/how-to/cud-analysis-flexible/> (<https://cloud.google.com/billing/docs/how-to/cud-analysis-flexible/>).

We will not notify you for increases in non-USD prices that are due to currency conversion fluctuations.

If you are looking up a text-based SKU identifier, such as CP-BIGQUERY-STORAGE, you can find mapping to the new SKU identifiers at Legacy SKU Identifiers (<https://cloud.google.com/skus/legacy-ids>). If you are looking for SKUs for Alpha features, visit the Pre-GA SKUs (<https://cloud.google.com/skus/pre-ga>) page. You must have been added to the respective Alpha feature to access the preceding link. Compute Engine discounts are detailed at Sustained Use Discounts (<https://cloud.google.com/compute/docs/sustained-use-discounts>). If you are looking for pricing information for solutions, visit the Solutions (<https://cloud.google.com/skus/solutions>) page.
